**THE ORIGINAL**  
**BOYD CODDINGTON** **2013**  
**WHEEL CATALOG**

Over 35 years ago my father, Boyd Coddington, turned the hot rodding world on it's ear by creating one-off custom billet aluminum wheels for the cars he was building. The famous cars my father built like the Vern Luce Coupe, Chezoom, and the Boydster had one thing in common...they all had a set of one-off custom billet wheels that he machined. 35 years later I am continuing the legacy my father left by creating some of the finest aluminum wheels on the planet to help your unique ride stand-out from the crowd. From concept to finished product, each wheel that leaves our facility has the attention to detail and the workmanship of a true Coddington product. If you are looking for a foreign product owned by a foreign company that simply slaps a name on a wheel you are in the wrong place. If a true American made Coddington product is what you desire to transform your ride then look no further.

Sincerely,  
*Chris Coddington*

# SIGNATURE SERIES

The name says it all. It's our signature wheels and the premium line that we hang our hat on. In this series you will see cutting edge design matched with state of the art machining and finishing techniques. American made from start to finish. We like to refer to these as sculpted pieces of rolling aluminum art. The Signature Series can be made to fit most 5 lug applications in sizes from 17-22".

**CAST SERIES**

Our cast wheels were a way to take our most popular billet wheels and make them in a high quality affordable cast version. Our cast wheels range in sizes from 15" -20" diameters and widths up to 19" wide. Our cast wheels come standard polished and in a wide range of custom finishes. Our cast series are available for most 5 lug applications.

# CODDINGTON COATINGS™

In the custom automotive world finishes are everything. When someone looks at your car they are going to notice 2 things; your paint job and your wheels. At Hot Rods by Boyd we have taken a new approach to finishing wheels.

Our Coddington Coatings are unmatched in the industry and are just what you need to give your wheels a different look. Our Coddington Coatings are a high temperature ceramic coating that have a satin finish that really accentuate the details of every wheel. Along with our Coddington Coatings we offer a wide range of powder coating and custom colors.
